Efraín Arturo Torres Martínez

Software Systems Developer

Profile

Hi! I'm a Software Developer with a demonstrated history of working remotely and in the program development industry. Skilled in Javascript, Node (Express, Mongoose, Sequelize), Server and Client Side Security, REST APIs, GraphQL, Angular, MongoDB, SQL, Java (Spring), C# (Asp.NET) and Client Relations.

Employment History

Information Systems Support Analyst at Suespacio.net, Cuernavaca

November 2015 – January 2016

Customer Support for Websites and Linux Server support, configuration and maintenance.

College Intern at Universidad Internacional, Cuernavaca

January 2016 – March 2017

Help developing the website for the university, managing databases and giving customer support. C#,SQL, Bootstrap, Javascript, HTML5

Systems Software Engineer at Chrome River, LA

March 2018 – Present

Develop, give support and solve problems with several websites for customers. Java, Javascript, SQL, AngularJS, MongoDB.

Education

Computer Systems Engineer, Universidad Internacional, Cuernavaca

April 2013 – December 2017

During college I helped out developing the university's website and databases.

I am

A proactive, self-taught, team player

I love learning new technologies and seeing how to apply them in a productive way.
I'm effective working with teammates and have great communication skills.
And I love a challenge.
